Design leader with 12+ years across ad analytics and enterprise data platforms. Expertise in agentic AI experience design, data visualization, and design strategy for complex data environments.

work experience

Aug 2024 - Present

Product Design Manager | Intuit

Lead UX strategy and a team of designers for Intuit's enterprise data platform, spanning data discovery, governance, lineage, observability, and pipeline authoring.

Team leadership

- Scaled Intuit's data platform from a localized discovery tool into company-wide infrastructure used by 6,000+ people monthly.
- Guided operational workflows that reduced access provisioning from 9 to 3 days (saving 4,000 hours/year) and cut restricted-data denials by 85%.
- Oversaw lineage and observability, ensuring zero marketing-data incidents during the 2025 tax peak; secured promotions for all direct reports.

Direct IC execution

- Authored the interaction model for agentic data search and drove architectural adoption of the Cursor/Claude data search MCP server, cutting time-to-insight to under 4 minutes.
- Shipped a GenAI onboarding workflow that accelerates data pipeline integrations for marketers from 1–2 weeks to under 24 hours.

Jan 2024 - Aug 2024

Principal Product Designer | Intuit

- Redesigned platform search with a semantic interaction layer, driving precision to 89% and defining the FY25 roadmap through foundational research.
- Designed clean-data features—AI-generated descriptions and maturity scorecards—making 7,000+ high-quality data products discoverable.

Jun 2021 - Jan 2024

Senior Product Designer | Intuit

- Founded Intuit's internal data catalog from scratch, replacing a legacy third-party system; drove top-5 click-through rates to 96% and reduced data discovery time from 45 days to 3.
- Shipped Intuit's first agentic data tooling, Data Copilot—500+ MAU, doubled SQL writing speed, presented by the CTO at Investor Day 2023.
- Built the first data lineage UI in 4 weeks, rendering impact graphs for ~30K tables and ~7K pipelines.

Oct 2017 - Jun 2021

Product Designer | 605 LLC

- Generated \$20M+ in revenue by designing and launching three analytics products from conception to launch.
- Led end-to-end design for “605 Impact”, a first-of-its-kind platform measuring TV advertising's impact on consumer behavior, and the redesign of “605 Platform”.
- Created an accessible, data-visualization-focused design system that scaled to support multivariate visualizations.

education

April 2017

University of Michigan - Ann Arbor

MS in Information - Human Computer Interaction

May 2012

University of Pune

Bachelor of Engineering - Computer Engineering

key skills

Agentic AI Experience Design

Design Strategy & Leadership

Data Visualization

Executive-level Communication

Mentoring & Team Development

Jul 2012 - Jun 2015

Software Developer | TIBCO Software

Java back-end developer; translated customer requirements into shipped enhancements for BusinessWorks, TIBCO's enterprise integration platform. Defined the MVP and feature set for the TIBCO Espresso mobile integration platform through competitive analysis and user research.
